

PetHealth™ Multivitamin Formula for Dogs

Dogs, like humans, are increasingly subjected to diets that are over-processed and unhealthy, and are exposed to a variety of environmental pollutants that can wreak havoc on the body. Poor nutrition and constant exposure to environmental irritants can lead to a variety of health concerns. Poor nutrition can dull the natural texture and shine of your dog's skin and coat. Along with a balanced diet, a good dietary supplement is beneficial in helping your pet maintain good health. Although a good balanced diet will provide a solid foundation, food alone may not supply all of the nutrients necessary to fulfill their unique requirements. All animals have different nutritional requirements and factors such as age, activity level, environment, genetics and breed will greatly affect the absorption of nutrients from foods. It is, therefore, important to provide your pet with an adequate supply of nutrients, which will support the body in successfully working, growing and developing properly. PetHealth Dog Multi-Vitamin Formula supplements your dog's diet with an adequate amount of key vitamins and minerals necessary to maintain optimal health. PetHealth Dog Multi-Vitamin helps promote healthy skin and eyes, helps promote the normal repair and growth of body tissues, provides antioxidant support, supports a healthy immune system and promotes digestive health. PetHealth, Advanced Solutions for Optimal Health!
